## Dog Facts

**Hearing** - A dog can hear sounds 250 yards away that most people cannot hear beyond 25 yards. The human ear can detect sound waves vibrating at frequencies up to 20,000 times a second. But dogs can hear sound waves that vibrate at frequencies of more than 30,000 times a second.

**Sight** - Dogs cannot see as well as humans and are considered colorblind. A dog sees objects first by their movement, second by their brightness, and third by their shape. Dogs can see color but it is not as vivid a color scheme as we see. It is much like our vision at twilight.

Dogs are able to see much better in dim light than humans are. This is due to the tapetum lucidum, a light-reflecting layer behind the retina. Because it functions like a mirror, it also accounts for the strange shine or glow in a dog's eyes at night.

## Pretty Paws Care Tips:

As the colder weather approaches, you may want to consider Paw Rub for your dog. This product protects your dog's paws from cracking during the winter. It moisturizes and helps to heal existing cracks. This type of product can also be used on the dog's nose. It is very safe to use on your dog.

You can also consider boots for your dog if you are planning on extended exposure to the cold or to areas that have been salted.

## Christmas Retail Products are here!!

Dawgs in Motion retail store has new Christmas items. Fun gifts for your dog or someone you know.

Stop in and check out our fun Christmas products and don't forget about our Pre-Holiday Open House.

## Testimonial

Hello Dawgs in Motion, I want to thank you for opening up your outdoor Agility course for run-thrus on Thursday afternoons. It's always great to have another venue to practice. And, thank you to Joan for offering her expert advice.

My Standard Poodle, Klara, made her Agility debut at the Oshkosh Kennel Club's trial October 18 & 19. She qualified and placed first in all her classes - four of four. Not bad for her very first weekend showing!

Thanks again,

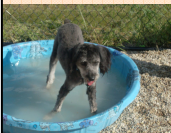

John Pittman
